

AMENDMENT TO THE CLAIMS

IN THE CLAIMS:

Please cancel claims 1, 5 and 20, and amend claims 2-4, 7, 9, 13-14 and 16-18 as follows. A copy of all pending claims and a status of the claims is provided below.

1. (Cancelled)
2. (Currently Amended) A brush according to claim 1, wherein a circular rotating member is installed in a cap and inserted in to an opening of a nursing bottle, and upper portions of the support members are fixed to the circular rotating member, and a knob bent vertically with respect to the direction of a rotary shaft protrudes from an upper portion of the cap.
3. (Currently Amended) ~~A brush according to claim 1,~~ A brush for washing a nursing bottle, which comprises:
at least one resilient support member which is unfolded so as to have a shape substantially identical with a shape of an inner peripheral surface of a nursing bottle, an inner side of a curved portion of the resilient support member having a thinner width than other portions of the resilient support member;
a washing brush attached to an outer surface and a lower end portion of the resilient support member and integrally expanded and contracted according to operation of the resilient support member; and
a cap inserted into an opening portion of the nursing bottle having an upper end of the resilient support member adapted to be rotatable,
wherein at least one hole is formed at a predetermined position in the resilient support member, and an insertion boss in which a catching portion having a diameter larger than a

diameter of a hole is formed at a position corresponding to the hole of the resilient support member and formed so that the washing brush is detachably attached on the support member.

4. (Currently Amended) A brush according to claim 1 ~~3~~, wherein the washing brush includes silicon.

5. (Cancelled)

6. (Currently Amended) The brush for washing a bottle of claim 5 ~~7~~, wherein the washing brush substantially conforms to a shape of the resilient support member.

7. (Currently Amended) ~~The brush for washing a bottle of claim 6;~~ A brush for washing a bottle, comprising:

at least one expandable resilient support member having a lower portion and curved side portion, wherein the curved side portion has a shape which substantially conforms to a shape of an interior surface of the bottle when the support member is in an expanded position and a washing brush is directly attached to the resilient support member; and

wherein the washing brush is attached to the resilient support member with a an insertion boss.

8. (Previously Presented) The brush for washing a bottle of claim 7, wherein the insertion boss includes a catching portion that substantially prevents the washing brush from being disconnected from a hole formed in the resilient support member.

9. (Currently Amended) The brush for washing a bottle of claim 5 ~~7~~, further comprising a cap attached to an end portion of the resilient support member.

10. (Previously Presented) The brush for washing a bottle of claim 9, wherein the resilient support member is attached to a rotating member attached to the cap that permits rotation of the resilient support member.

11. (Previously Presented) The brush for washing a bottle of claim 10, wherein the rotating member is attached to a second rotating member arranged on an upper portion of the cap.

12. (Previously Presented) The brush for washing a bottle of claim 11, wherein the second rotating member is a knob comprising a knob portion.

13. (Currently Amended) The brush for washing a bottle of claim ~~5~~ 7, wherein the at least one resilient support member includes two or more resilient support members.

14. (Currently Amended) The brush for washing a bottle of claim ~~5~~ 7, wherein the at least one resilient support member includes four resilient support members.

15. (Previously Presented) The brush for washing a bottle of claim 14, wherein the four resilient support members are arranged to be at a substantially equal distance from each other.

16. (Currently Amended) The brush for washing a bottle of claim ~~5~~ 7, wherein the resilient support member comprises silicon.

17. (Currently Amended) The brush for washing a bottle of claim ~~5~~ 7, wherein the washing brush comprises silicon.

Serial No.: 10/060,024

--6--

18. (Currently Amended) The brush for washing a bottle of claim ~~5~~ 7, wherein the ~~bottle is a nursing bottle~~ brush is sized and adapted for a nursing bottle.

19. (Previously Presented) The brush for washing a bottle of claim 13, wherein the lower portion of the resilient support members are attached at an end portion.

20. (Cancelled)
